Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No.	Applicant(s)
	09/830,816	MUHONEN ET AL.
	Examiner MINH D DAO	Art Unit 2682

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

1) Responsive to communication(s) filed on _____.
 2a) This action is FINAL. 2b) This action is non-final.
 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

4) Claim(s) 1-16 is/are pending in the application.
 4a) Of the above claim(s) ____ is/are withdrawn from consideration.
 5) Claim(s) ____ is/are allowed.
 6) Claim(s) 1-3 and 6-16 is/are rejected.
 7) Claim(s) 4,5 is/are objected to.
 8) Claim(s) ____ are subject to restriction and/or election requirement.

Application Papers

9) The specification is objected to by the Examiner.
 10) The drawing(s) filed on ____ is/are: a) accepted or b) objected to by the Examiner.
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. §§ 119 and 120

12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
 a) All b) Some * c) None of:
 1. Certified copies of the priority documents have been received.
 2. Certified copies of the priority documents have been received in Application No. _____.
 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
 * See the attached detailed Office action for a list of the certified copies not received.
 13) Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application) since a specific reference was included in the first sentence of the specification or in an Application Data Sheet. 37 CFR 1.78.
 a) The translation of the foreign language provisional application has been received.
 14) Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121 since a specific reference was included in the first sentence of the specification or in an Application Data Sheet. 37 CFR 1.78.

Attachment(s)

1) <input checked="" type="checkbox"/> Notice of References Cited (PTO-892)	4) <input type="checkbox"/> Interview Summary (PTO-413) Paper No(s). _____.
2) <input type="checkbox"/> Notice of Draftsperson's Patent Drawing Review (PTO-948)	5) <input type="checkbox"/> Notice of Informal Patent Application (PTO-152)
3) <input checked="" type="checkbox"/> Information Disclosure Statement(s) (PTO-1449) Paper No(s) <u>4</u> .	6) <input type="checkbox"/> Other: _____

Detailed Actions

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1,2,3, 6,7,8,14,15,16 are rejected under 35 U.S.C. 102(e) as being anticipated by Silver et al. (US Patent 6,560,457).

Regarding claim 1, Silver teaches a method for providing location service information (See Figs. 5 and 6, Location Service Node 200) related to a mobile station in a mobile communications system supporting connections of a first type and a second type (Col. 5, lines 21-31), the method comprising: receiving a request from a requesting entity (Col. 9, lines 13-17); retrieving the location service information related to the mobile station (Col. 9, lines 17-25); and providing a response to the request (Col. 9, lines 26-30); wherein the retrieving further comprises: determining a preferred type of connection for the retrieving based on the first set of predetermined criteria; and performing, in the retrieving step, at least a first attempt via the preferred type of connection (Col. 5, lines 21-31; Circuit-Switched Network 110).

Regarding claim 2, Silver teaches the method of claim 1 wherein the first set of predetermined criteria is determined by checking whether the mobile station currently has an active connection via at least one type of connection (Col. 5, lines 21-24).

Regarding claim 3, Silver teaches the method of claim 2 wherein the checking is based on examining the request (Col. 5, lines 21-31).

Regarding claim 6, Silver teaches the method of claim 1, wherein the first type of connection is circuit-switched and the second type of connection is packet-switched (Col. 5, lines 21-31).

Regarding claim 7, Silver teaches the method of claim 6, wherein if the mobile station is having an ongoing call, the preferred type of connection is circuit-switched, otherwise it is packet-switched Col. 5, lines 21-31).

Regarding claim 8, Silver teaches the method of claim 6, wherein if the mobile station is having an ongoing call, the preferred type of connection is circuit-switched, otherwise it is packet-switched Col. 5, lines 21-31).

Regarding claim 14, Silver teaches the method of claim 1 wherein the request is received by a Gateway Mobile Location Centre (See Fig. 1, MSC-GW), and the method

further comprises retrieving (Col. 9, lines 17-25), by the Gateway Mobile Location Centre the location service information via a Mobile Services Switching Centre (See Fig. 1, MSC-S), which in turn retrieves the location service information via a Serving Mobile Location Centre (See Fig. 1, MSC-O), directly, if a circuit-switched connection has been established for the mobile station, and, otherwise, indirectly, via a Serving GPRS Support Node (See Fig. 1, SGGN); (Col. 4, lines 24-55).

Regarding claim 15, Silver does not directly teach the limitations of claim 15. However, it would be inherent that, referring to Fig. 1, the method of claim 14 further comprising sending from the Gateway Mobile Location Centre to the Mobile Services Switching Centre the address of the Serving GPRS Support Node in order for all portions of the system to communicate with each other.

Regarding claim 16, Silver teaches an arrangement for supporting location service information (See Figs. 5 and 6, Location Service Node) related to a mobile station in a mobile communications system supporting circuit-switched communications and packet-switched communications (Col. 5, lines 21-31), the arrangement being configured to: receive a request from a requesting entity (Col. 9, lines 13-17); retrieve the location service information related to the mobile station (Col. 9, lines 17-25); and provide a response to the request (Col. 9, lines 26-30); determine a preferred type of connection for the retrieving on the basis of a first set of predetermined criteria; and to

perform at least a first attempt via the preferred type of connection Col. 5, lines 21-31; Circuit-Switched Network 110).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claims 9-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Silver et al. (US Patent 6,560,457) in view of Billstrom et al. (US Patent 5,590,133).

Regarding claim 9, Silver teaches that the first type of connection is circuit-switched and the second type of connection is packet-switched (Col. 5, lines 21-31). However,

Silver fails to teach that the method of claim 6 further comprises establishing at least one implicit Packet Data Protocol context. Billstrom in his invention teaches an establishing of at least one implicit Packet Data Protocol context (Col. 18, lines 28-32). Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention was made to combine the teaching of Billstrom and Silver in order to have a communication system that would be able to provide integrated system concept that provides the new packet data services using the current TDMA cellular infrastructures to the extent with packet data functional performance requirements as taught by Billstrom (Col. 3, lines 62-67).

Regarding claim 10, the combination of Silver and Billstrom teaches the method of claim 9 wherein establishing the Packet Data Protocol context includes allocating a predefined Network layer Service Access Point Identifier value (Reference Billstrom, Col. 18, lines 12-19).

Regarding claim 11, the combination of Silver and Billstrom teaches the method of claim 9 further comprises establishing at least one implicit Packet Data Protocol context between the mobile station and a support node (Reference Billstrom, Col. 18, lines 8-11).

Regarding claim 12, the combination of Silver and Billstrom teaches the method of claim 9 further comprises establishing at least one implicit Packet Data Protocol context

between the support node and a Serving Mobile Location Centre currently serving the mobile station (Reference Billstrom, Col. 18, lines 28-32; Also see Fig.16).

Regarding claim 13, the combination of Silver and Billstrom teaches the method of claim 9 further comprises establishing at least one explicit Packet Data Protocol context between the support node and a Serving Mobile Location Centre currently serving the mobile station (Reference Billstrom, Col. 18, lines 28-32; Also see Fig.16).

Allowable Subject Matter

6. Claims 4 and 5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Regarding claim 4, Silver et al. 9US Patent 6,560,457) teaches all limitations in claim 1. However, Silver fails to teach that the method of claim 1 wherein if the first attempt results in a failure, a second set of predetermined criteria is determined based on a reason for the failure as specified in the claim.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

a. Karmel (US 2001/0041535) DOSCLOSES Positioning System Using Packet Radio To Determine Position and To Obtain Information Relative To A Position.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to MINH D DAO whose telephone number is 703-305-5589. The examiner can normally be reached on 8:30 AM - 5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, VIVIAN C CHIN can be reached on 703-308-6739. The fax phone number for the organization where this application or proceeding is assigned is 703-305-9508.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-305-3900.
